| CONFINEMENT OF ANIMALS          | Caged - adequate space | Zoo |

General Report Comments: 3 Elephant observed appeared to be in good condition. Water was provided in a big pond. The branches of trees and hay was provided as food. Also there are some supplement which are given to the animals as vet and dietician instructions. The white film on top is caused by birds which comes to drink. The enclosure are a minimum standards for the zoos.

2 Hippopotamus were observed appeared to be in good condition. They have 2 minute water enclosures one had no water. The employees were cleaning it . The other had enough water for the hippos to immerse themselves. Philimon told me that they change water for both dams once a week on different days. The other rest room had some feaces but not lot it appeared that it was for that day and it shows that they do clean. They also clean if the hippos are outside the sleeping quarters.

4 Giraffes were observed appeared to be in good condition . Turf was provided for them to eat. With regards to the trees the Antelope keeper Mr Philimon told me that they provide them with some tree branches by which they get from Johannesburg city parks to feed the animals.

1 black rhino observed, appeared to be in good condition. The area were they keep the rhino does not have grass to graze as it is wilted in winter but they provide the rhino with hay and some supplement. Water was provided inside the room were it sleeps and it has access to go in and out . There is security company called Mafolo which patrols around the zoo.

White rhinos 3 were observed appeared to be in good condition. Also was provided with hay and some supplement to feed them. The supplements are not given a lot. They give according to what the dietician and the vet' s instructions.

9 lions were observed, they appeared to be in good condition. No lion which was underweight. Water was provided to the lions outside they are provided with a big pond and inside the sleeping quarters they have some bowls. They have 3 enclosures were they keep 3 lions per enclosure 2 female and 1 male. The 8 lions are fed 4 times a week according to the dietician instructions. One juvenile lion is fed every day.

7 tigers were observed all appeared to be in good condition . The enclosures are a standard size for the tigers. No Tiger appeared to be thin.

All the animals appeared to be in good condition. The space is adequate standard size even though as SPCA we are opposed to confining or caging the animals. The storerooms had enough food for all the animals at the zoo and their fridges had some food.
