General Report Comments: I met Mr Lipshitz at his house. He owns 3 dogs that appeared to be in acceptable physical condition. He did say the one his dogs, the Staffie, managed to escape through a gap on one side of the house and made his way to the gate to chew off the motor gate wiring and escaped . The dog sustained minor bruises on the face which I found already healing. They are kept at the back of the yard separated from front and the reckoned this might have caused by boredom when the owner is no home. I found 4 accesible, potable water bowls at different spots. The dogs also have access to the house and choose any where to rest when the owner is not home. He mentioned a gardener who come once a week to overlook the garden and maintenance. No violation of the APA was noted during my inspection.
