General Report Comments: I got to the house where I found the dog owner's sister, Karyn who explained to me that there was a dog locked at the back in his room. She took me to the back to see the dog. There were 2 doors used to block off the entry but she removed them to gain entry. I discovered the dog was kept in a passageway but there was a dirty bedroom with an open broken door. There was a bucket of water placed along the passageway but it appeared to be dirty. The room was very untidy and I also discovered a decomposed rat carcass on the floor that appeared to have been killed by the dog as food. I spoke to the owner, Danial Mkhize, over her sister's phone and he told me that he left for at least 6 days after he and his sister got into a fight and was staying at a friend's place in Kempton. I asked him whether he made any arrangements with anyone but he said he never did so, but he can get one of his friends to step in for him by collecting the dog to his place. I told him that I will be taking the dog because he failed to be responsible enough to make any arrangements to ensure proper care of the dog. The dog appeared to have been starved or underfed as it was sniffing through rubbish bags upon being freed from confinement. His sister signed over the dog as she also admitted that she spent most of her time unavailable at home and she has kids to take care of as well.
