General Report Comments: I was granted access to enter the house by the daughter Blessing after explaining the reason for my visit. There were 2 dogs on the property a juvenile male and a mature female cross Pitbull dogs. The male dog had a stitched wound while the female was partially limping on the right foreleg. Both dogs were taken to the Sandringham Vet where treatment was rendered yesterday according to the lady of the house Ms Delani Sibanda. She said her husband Lucky Dube who was not present on the premises, took the dogs to vet after discovering about the incident. Both dogs appeared to be civil towards each other and even after the incident. Ms Sibanda said that the female was booked in for sterilization next week on the Thursday 30th of November. The dogs were found under treatment because medication was also present to me during my inspection. I advised them to always monitor the dogs even after they are both sterilized. Matter concluded.
