General Report Comments: I conducted my follow-up inspection hoping to find the hygiene and maintenance issues rectified. I met Mr Nkomo on-site on this day. The dogs appeared to be in a fair physical condition even though their holding condition was unfavourable. The roof of the cages was tidied up as per the instructions in my warning. The dog faeces in dog food bags kept piling up. The cage that was found slightly askew exposing holes was not repaired. The cage with the iron sheet previously found out of place was also not repaired on the roof. I phoned the supervisor, Tony who promised to fix everything as required. A proper valid PAPA license was provided to me, except for the DH Level certificates. I issued another 24-hour warning to Imvusa Security. To follow-up soon
