CONFINEMENT OF ANIMALS	Free roaming - in property	

General Report Comments: We haven't received any respond to the warning that were issued. There have been some telephonically communication by the owner to Mr Maila but no vet report was provided to us only paper send to me written (Travelling vet and antibiotics treatment given) but not informative. A follow up inspection was conducted accompanied by my manager on the 06/08/2024. General inspection was conducted, horses are still in same condition. I observed some food (5 bags perde pille, 4 bags lusern pille and bales of eragrostis)
There is no passport for the horses and no records of when last the horses were attended by a farrier. A final written warning was issued for the owner to seek veterinary intervention and to provide us with a veterinary report. We also warn the owner not to use the horses until we received a report and recommendations from the vet. Mr Maila contacted the owner who indicated that he is no able to get a vet to check the horses. Owner was provided with few numbers of the vet and he was informed that we need a report by Monday the 12/08/2024

We also checked on the condition of the chickens and the rabbits. Mr Abdullah was present during our inspection, chickens were attended by Wendywood vet (011 8021164)
The following medication are being administered: Terracotril, premolt supplements and silbecor cream.
He told us that he slaughtered all the rabbits. Case is still pending.

ACTIONS

Warning Issued Y3458

REPORT OUTCOMES

Follow-up inspection to be conducted 2024-08-13
