General Report Comments: At the house, I found the owner, who allowed me access. She was keeping 2 puppies indoors. The puppies appeared to be in suitable body condition. There was potable water, and they were being fed household food. The owner did admit to one of the puppies sneaking through the gate and running into the street but said they were working on blocking the gaps on the gate to prevent the puppy from running to the street. I educated the owner about the importance of caring for dogs and animals. The puppies were not vaccinated but I told the owner that the puppies would be at risk of catching common puppy diseases if not vaccinated soon. Mrs Dill revealed to me that they were going a financial difficulty at that time and even when convinced her to give up the puppies she said her children would cry over them and it would break their hearts if I took them. I still offered to consider taking them to an affordable animal clinic such as the SPCA. I also informed her about the poisoning of dogs in the area and on techniques to prevent this. I will keep checking up on them when I'm in the area
