General Report Comments: Upon following up, there were no changes made as per the warning. I found 8 chickens in the same cage of disrepair outside the yard. They didn't provide any water for the chickens. No troughs were installed and the cage was never replaced with a more suitable one. The "Road-runners" living place remained the same. Only the nesting rooms were cleared off the manure but not the rest of the passageway. Metal and steel rubble were still left in the chickens' vicinity as before. The owner said he was under the understanding that the nesting room was the only place that needed cleaning. The chickens' night room was also not clean. Water for overnight drinking did not appear to be available which I ordered to be provided at all times. One of the hens on sale was found limping and unwell. I instructed for its immediate destruction. The hen was selected out and was immediately destroyed. I suggested fixing gutters at suitable height for feeding and drinking but had already got a piece of a gutter and Mrs Ndlela said they would be working on modifying the cages in the next few days. I issued a warning for these offences. To follow-up in 2 days
