General Report Comments: I finally got through to the owner who instructed her helper to give me access to the house. I found 3 dogs (2 females and a male) in acceptable physical condition at the house. All of the same age and the 2 bitches were coming on heat. There were containers for feeding and some filled with potable water. The dogs were sleeping in a secluded covered veranda and a vacant car garage. The helper admitted to the dogs running into the streets whenever a car is driving through but said she usually calls them back inside immediately. She claimed that they are never out on their own. The dogs had access to the driveway and this caused them to get a chance to run into the street. The yard is separated with brick wall partitions but access to the back did not have any door or gate. I contacted the owner via WhatsApp to inform her of the situation because she couldn't take a call advising her on these concerns. To get proper feeding bowls, install a gate that prevents the dogs from accessing the driveway, get them dog kennels even though adequate was available and also having them sterilized. I will be waiting for her response. Spot check may only be needed when in the area
