General Report Comments: The owner's partner, Linda Shabalala, opened the door for me to access her house. They keep a 4-month-old male black and white crossbreed (Africanis) in the apartment. The dog appeared to be in acceptable physical condition with all vaccinations already done. A bedding and feeding station was provided in their daughter's bedroom. However, it did not have access to a yard or a garden in a 3rd floor apartment to express normal behaviour. The puppy displayed playful and teething behaviour, likely to be destructive to furniture. I advised her about puppy training with a written warning to find an alternative suitable, place which afford the dog adequate space as he already was, within 2 months
