ADEQUATE SHELTER AVAILABLE	Cannot see from gate - no access
ANIMALS IN GOOD CONDITION	Yes
VETERINARY PROBLEMS / HEALTH CO	No

General Report Comments: On my inspection, two juvenile dogs were observed within the front section of the property. The dogs are described as follows: 1. One black and white female, juvenile cross Labrador 2. One white dog with black spots, juvenile. Both dogs appeared to be in fair condition, with an estimated body condition score of 4/5. At the time of observation, neither dog showed visible signs of distress. Both dogs were alert and responsive, wagging their tails while at the gate.
No dog was observed with its head stuck through the front gate during the inspection. However, it was noted that the dogs are able to place their heads through the gate openings and withdraw them without difficulty. The dogs were housed in the front yard area of the property, where various items, including refuse, an old chair, and a ladder leaning against the metal fence, were present.
Access to the property was not granted, and a full inspection of the premises could therefore not be conducted. A warning notice was left at the gate requesting that the owner or responsible person contact the inspector to arrange a comprehensive welfare inspection.

ACTIONS

Warning Issued Y2481

REPORT OUTCOMES
