General Report Comments: During my door-to-door inspection, I met with Sithandiwe and observed that her cat appeared to be underweight. I asked her about the cat's condition, and she informed me that she did not believe the cat was thin. I also asked whether the cat was eating and drinking water normally, and she confirmed that it was.

I advised her that the best course of action would be to take the cat to a veterinarian for a full examination. I also recommended that the cat be sterilized after receiving the necessary treatment. The owner agreed to the recommendation and gave permission for me to take the cat to the veterinarian.
