General Report Comments: Following a follow-up by the Sandton SPCA on 21 August 2026, an expired permit was provided. Dr Baker did not satisfactorily comply with the warning or provide adequate evidence that Panchula had received the required veterinary assessment and treatment and was not willing to comply with the warning when I was talking to him and verbally abusive toward me.

Due to the ongoing welfare concerns and Dr Baker failure to satisfactorily address the issues raised, I applied for a warrant

The warrant was granted the Sandton SPCA executed the warrant and the Monkey was confiscated and OB No: 1930/08/2026

Monkey was transported to the Veterinary Academic Hospital at Onderstepoort for veterinary examination and treatment.

The Sandton SPCA is currently awaiting the formal veterinary report setting out the veterinary findings, diagnosis and treatment provided.

The veterinary report will form an important part of the evidential record and will be considered in determining the appropriate further legal action

Monkey was discharged from the Veterinary Academic Hospital on 4 September 2026.

Following discharge, arrangements were made for Panchula to be placed at the Vervet Monkey Foundation, an NSPCA-accredited sanctuary, where the monkey can receive appropriate species-specific care and ongoing monitoring.

upon receipt and assessment of the veterinary report and supporting evidence, to proceed with the appropriate legal prosecution process where the evidence and applicable legislation support such action.

The relevant information and documentation will also be submitted to the South African Veterinary Council (SAVC) for consideration in relation to any veterinary or professional matters arising from the case, where appropriate

The matter remains ongoing once vet report received case will be open.
