General Report Comments: Upon my arrival at the premises, I met with a young boy who informed me that the dog belongs to his father. He advised that his father was not present at the time of my inspection as he had gone to work.
I enquired about the dog's diet, and the young boy informed me that the dog is primarily fed home-cooked food, including pap and meat, and is sometimes provided with commercial dog food. He further stated that the dog is given snacks from time to time, although not on a regular basis. The young boy also informed me that the dog is taken for walks occasionally.
During my inspection, I observed that the premises were reasonably clean and that there were no apparent issues relating to general cleanliness at the time of the inspection.
