Report/Findings:

A welfare inspection was conducted at the above address for the purpose of examining the conditions in which the dogs are so kept. Upon arrival at the property, access could not be gained as the gate was locked. We then left a warning at the gate for a follow up inspection.

The property was revisited and at the property we were assisted by Mr. Gerry throughout the inspection. In terms of the initial complaint, we inspected two dogs of which appeared to be in acceptable condition. The dogs were sheltered, fed and watered adequately upon inspection. They were kept in an area affording adequate space. Further, the complainant was advised on the relevant legislation for the barking nuisance caused by the dogs. No welfare concerns noticed which would have warranted our intervention consequent to inspection.
