ANIMALS IN GOOD CONDITION	Yes	
VETERINARY PROBLEMS / HEALTH CO	No	
CONFINEMENT OF ANIMALS	Caged - adequate space	Breeder

General Report Comments: Address:
Cotsworld Drive
Dawnecliffe.

I was with King on this case.

Upon arrival we hooted and someone opened the gate. We met the maid and introduced ourselves she then went to call the owners wife. There was no barking when we entered the property.

The owners wife arrived and she requested must wait for her husband as she doesn't wanna get involve. We waited about 10 minutes and Tyron arrived. We introduced ourselves and shared a nature of complaint.

Tyron claimed the complainant is the neighbor who lives at number 20. I told Tyron the complainant was anonymous and he granted us to the section where the dogs are kept. Two dogs were kept in each enclosure and the enclosures are adequate size. Dogs are grouped according to their genders. Every enclosure is clean and hygienic. Adequate kennel is provided for the dogs and looking at the bowls i could tell the water is changed everyday.

I then noticed the dogs have cropped ears and i questioned the Tyron regarding cropping of ears . He then told me the dogs were exported like that i then made it clear to him that if we should receive any evidence that he crop the ears of the dogs I'll take action in terms of the law. He then told me that it is illegal and dog fighting. His dogs are for dog shows. There is 7 enclosures seen on the property. I then questioned Tyron about the barking of dogs he then told me that he Separate the dogs as he doesn't want them to mate and the male dogs bark at times as they wanna mate with a female. Tyron further stated that he doesn't want the dogs to mate this year. We then walked to the back where there is a section there are two dogs roaming freely.

This section is a runner where dogs can play and exhibit animal natural behavior. There are no feaces seen. However the dogs are rotated as there is a worker who ensures the dog's are rotated and the enclosures are cleaned. I then requested the owner to show me the medication he uses on minor injuries of the dogs. He took me to the house where he showed me adequate dog food and spray he uses for minor wounds on the dogs. The dewormer was seen. All the dogs on this property are clinically alart and the owner isn't interested in a sterilization.

There is no contravention of the Animals Protection Act 71 of 1962 on the inspection. There is no further action that can be taken regarding the act. With these findings i strongly believe the case can be closed. The barking of the dogs falls under the infringement of the by laws

NFA.

ACTIONS

NO ACTION REQUIRED
