General Report Comments: Upon arrival i met Titus who granted me access and field officer King to enter the property .

The living environment is clean and hygienic. The dogs were observed in a good condition and they have access to adequate wooden shelter that can accommodate all the dogs. The dogs have access to portable water provided in a container.

I then spoke to the owner regarding a sterilization and he told me that he is not Interested at the moment but he will give us a call if he changed his mind. I could see 2 running chains set up on property and Titus told me that he didn't want male dogs to mate with the female but as soon as the dog wasn't on heat the dog was released.

Titus was also educated about the importance of vaccination and the entire family was taking notes .

I strongly believe the case can be closed in terms of the Animals Protection Act 71 of 1962 there is no further actions that can be taken. The case can be closed.
