General Report Comments: Upon arrival i met Patricia and she was with her husband.

I shared a nature of complaint and they granted me access to enter the property. I requested that they put two dogs in the house on the property as they are very aggressive. I entered the house and 8 cats were observed roaming in the house. The house is clean and hygienic. There is an empty living that is reserved for cats. All the the cats appears to be in a good condition.

The cats have access to drinkable water and food is provided for the cats. The owner further showed me proof that all the 7 female cats are sterilized. 2 kittens are recently sterilized. The dogs have access to the garage when they are roaming freely and the other male dog is left in the house as it is an albino pitbull. However if the sun is about to set the dog is left to roam freely.

There is no contravention of the Animals Protection Act 71 of 1962. There's no need for anything else in the Act. The cats on this property are sterilized except for 1 male..
