General Report Comments: Upon arrival I entered the property and met Sifiso Gasa who allowed me to do an inspection.

I shared a nature of complaint and they are busy building the house. Sfiso is the owner of the property and we walked to the garden where we i observed two goats tethered with a rope that is about 7 meters long. The dogs appears to be in a good condition and they are clinically alert. The goats don't appear to be sick and they have access to trees as shelter during the day to protect the goats from weather elements.

The water is placed in the center where the goats can reach and there is always someone on site. However the goats are moved in the house at night. The property is not adequately fenced as there is no gate.

I strongly believe the case can be closed as There is no contravention of the animals protection act 71 of 1962. There is no further action that can be taken regarding the act. The case can be closed.
