CONFINEMENT OF ANIMALS	Static Chain - adequate length The dog runs outside when someone is driving in and this is a

General Report Comments: Upon follow up inspection i met Siyabonga and explained to him i came to do a follow up inspection based on the dog named Simba.

He stated that he was waiting for us to come back. The gate was wide open during the follow up inspection.

We entered the property and he went to remove the collar on the dog named Simba . The dog was observed the wound has healed completely and the coat is growing back. The dog has access to adequate kennel and portable water is provided. Overall the dog is in good health based on my observation it can cover the whole property and there is a rope that is extended with a chain to ensure it is not heavy for the dog.

I strongly believe the case can be closed. There is no contravention of the Animals Protection Act 71 of 1962 and there is no further action that can be taken regarding the act. Case can be closed until further notice.
