General Report Comments: Upon arrival i met Fihla she granted me access and i shared a nature of complaint.

She then told me that the mother dog was surrendered at the SPCA as she escaped when there was a storm. There is chicken mash added on the main gate to ensure the puppies don't escape.

Two puppies were observed on the property roaming freely having access to adequate kennel . The living environment is clean and hygienic. No puppy appears to be sick and they have access to water. There is no adult dog that was observed on the property.

I strongly believe the case can be closed as there is no contravention of the animals protection act 71 of 1962 and there is no further action that can be taken regarding the act.
