General Report Comments: On inspection I was accompanied by inspector Lindokuhle to conduct an inspection

Upon arrival we hooted and Anita Gave us attention to enter the property . We shared a nature of complaint and she stated she has nothing to hide.

The dogs are kept in different houses (sleeping quarters) that adequate space to roam around. These dogs always have a dog seater who is always present in the house to monitor the dogs. The houses are cleaned with F10 to disinfect.

In each and house (sleeping quarters) we went two the dogs get along and they are not aggressive towards each other. Windows are opened and there is ventilation in the house. Portable water is provided for the dogs. All these dogs are taken out to the runners at the farm on schedule. They are separated in groups according to which house (sleeping quarters) they belong to and the dog seater is the one walking the dogs.

Small breeds are kept alone and the fencing is adequate. No dog appears to be terrified. One dog was at the veterinarian for a check up during our visit. On the runners there are enrichments provided and water containers.

We then questioned Anita about the rats . she then stated rats come and go. They are farm rats however she does phone pest control to come out.
