General Report Comments: Upon arrival i met Li Ann and she granted me access to the property .

I shared a nature of complain and she didn't have a problem if i do the inspection. Li Ann then stated 4 dog's belong to her mother as they live on the same property. 9 dogs i counted in total. The dogs were observed in a good condition and clinically alert.

She had to close the safety gate for my safety since she cant control all the 9 dogs. The grass has been mowed and i saw water bowls around the property. The dogs have access to water at all times and the living environment is clean. The dogs are roaming freely on property at all times, have access to the house at all times and they are house dogs.

I also saw bowls of dog food that was fresh which was a sign that the dogs are well fed. No dog was observed scratching and there was no ticks on my body when i left the property.

On a previous day i investigated complaint and he stated he will file his complaint also cos he claims he knows the complainant.

This is a neighbors dispute. I strongly believe the case can be closed. There is no contravention of the animals protection act 71 of 1962 and there is no further action that can be taken.
