General Report Comments: Upon arrival i hooted and a woman who introduced herself as Qhawekazi came to the main gate.

I shared the reason for visiting the property however she granted me access to enter the property.
The dog in question is named Rocky and the dog appears to be in a good condition.

The gate was locked during the time of the inspection. Qhawekazi is a nurse she then explained that the dog goes outside when someone opens the gate and we walked around the property. I didn't see any holes on the fencing and the living environment is hygienic. The dog has access to portable water and shelter is provided for the dog. The owner of the dog is in a wheelchair and i met him. The owner doesn't wanna surrender the dog at all and the dog was taken to Superdogs for training. The owner showed me the certificate as proof and the owner further explained that they always close the gate. The problem start when someone opens the gate to enter his property.

I then advised the owner that he must keep the gate locked at all times.

There is no contravention of the animals protection act 71 of 1962. I strongly believe the case can be closed as there is contravention of the act. Case can be closed until further notice.
