General Report Comments: Upon arrival hooted and Ronan came out.

He then granted me access to enter the property and i shared a nature of complaint.

Ronan explained that when inspector Petros was at the property last year. The dog was on a long chain and he raised finances to build a big enclosure so the dog can be free as he didn't like to see his dog on a chain.

We walked to where the dog is kept and the dog appears to be in a good condition . The dog was aggressive during the inspection and the enclosure is adequate size. I lighted a touch and to check everything on the enclosure. Portable water provided, the living environment is clean and hygienic. The property is not adequately fenced and that the reason why the dog is kept in this enclosure. The dog has access to adequate kennel that can protect the dog from all weather elements and this enclosure is fixed to the house in L-Shape. The dog will always have shade.

I strongly believe the case can be closed. There is no contravention of the animals protection act 71 of 1962 and there is no further action that can be taken. The dog in question is sterilized.
