General Report Comments: The dogs were collected for sterilization and all the dogs are sterilized on this property.

The dogs are observed in good health and clinically alert. The dogs have access to shelter and portable water. There are no external parasites observed and the dogs have shiny coat as a sign that the treatment did work. The dogs are roaming freely on property

I strongly believe the case can be closed. There is no contravention of the animals protection act 71 of 1962 and there is no further action that can be taken. All the animals on the property are sterilized.
