General Report Comments: Upon arrival i hooted and Rosheen opened the gate. She then introduced herself and i shared a nature of complaint

We went to the backyard where i observed 3 dogs roaming freely and clinically alart. The dogs have access to shelter and living environment is clean.

We then went to another section of the property where there is a big enclosure that is adequate for the dogs. It is adequate size and has shelter and there is a opening where the dogs can exit and roam freely. This living environment is clean and hygienic. She then explained that the issue is when the dogs are placed in the front yard the dogs exits the property once someone opens a gate.

There is no contravention of the animals protection act 71 of 1962 and there is no further action that can be taken. I strongly believe the case can be closed and all the animals on this property are sterilized.
