General Report Comments: Upon arrival i hooted and Michaela came out. I shared a nature of complaint and she didn't have a problem to grant me access to enter the property.

In the front yard 4 small breeds are observed and they appear to be in a good condition. One dog named Bella has been recently sterilized at Hillcrest Vet and it has a corn around the head . All the dogs in the front yard are clinically alart and have access to the house at all times. 2 big kennels are also provided in the front yard. The dogs are rotated according to the Michaela and they are separed to they don't fight at all.

3 Rottweiler are kept in the back yard. The living environment is clean and hygienic. The dogs don't appear to be terrified of Michaela and she also explained that if the dogs are trying to attack each other. They use a stick to chase them so they stop. The dogs have access to portable water in blue container and the dogs don't have any injuries.

I issued a warning stating

It has been bought to attention that you were seen heating the dogs. If we should receive any evidence supporting there allegations. Further actions may be taken in terms of the Animals protection act 71 of 1962.

I strongly believe the case can be closed. There is no contravention of the animals protection act 71 of 1962 and there is no further action that can be taken.
