General Report Comments: Upon arrival i hooted several times. A woman came to the gate she introduced herself as Mrs Ngema

I entered the property and stood at the drive way as i didnt feel comfortable entering the property.

Mrs Ngema told me that SPCA has visited the property 2 years ago. I then questioned her how often the dogs go out. She responded that they go out when someone opens the gate and she also mentioned that they were breaking the fence to enter neighbors yard. They have closed off every gap and the dogs never attacked kids. I then made it clear that if the dogs attack anyone on the road they will be held liable.

Two dogs were observed roaming freely on property. They have access to kennel and garage as shelter. The dogs are clinically alert and have access to sufficient water.

I issued a warning
To keep your animals inside your premises at all times.

I strongly believe the case can be closed. There is no contravention of the Animals protection act 71 of 1962 and there is no further action that can be taken.
