General Report Comments: Upon arrival I hooted and i was accompanied by inspector Petros.

We Met regan and he granted us access to enter the property . After sharing a nature of complain he took us to where the dogs are kept. The dogs are kept in the enclosure and he explains the dogs rush to leave the property when he or someone opens the gate. The house is closer to the busy main road. 3 dogs are observed in a good condition and Clinically alert. The dogs have access to kennels and portable water is provided.

The enclosure is adequate size cos the dogs can express animal natural behaviour. Regan also told us that at night he released the dogs so they can roam around the property and for that reason he knows no one will open the gate at night.

I strongly believe that the case can be closed. There is no contravention of the animals protection act 71 of 1962 and there is no further action that can be taken.
