CHECKLISTS

General Report Comments: The owner has brought the dog into the clinic to be PTS in a very poor condition and apparently has been in this condition for more than a month. The dog was emaciated with ribs and hip bones protruding with no muscle mass but extremely swollen tummy. When the owner was asked why he took so long to seek help he was using transport and finances as an excuse, but also admitted that he knows the SPCA can help as we had assisted with one of his previous dogs that got injured. He was therefore issued with a warning
