ANIMALS IN GOOD CONDITION	No *** youngsters slightly underweight
VETERINARY PROBLEMS / HEALTH CO	No

General Report Comments: Was met with a family member. The three younger dogs (1female 2males) do appear to be slightly underweight. According to the family member they have recently been dewormed and sterilised by the DBN SPCA and are due to return 02/09/2026. They are feeding them montego twice a day separately. The old female is in a fair condition no sign of any tumors just old. The family member could not show me any documentation as he did not access to that. Send DBN a email to confirm and told the family member they are a little underweight they must please seek advise from vet when they return
