General Report Comments: Was met with the owner. One dog was found roaming freely (One of the adults) but there were ticks in his ears so advised on parasite prevention. The other adult was on a running chain with access to water and shelter however the owner decided to surrender this one dog because of age. The puppy's skin is looking much better and the owner says that she is continuing with tick and flea prevention. The puppy also is on a running chain with access to proper shelter and water. No further action to be taken
