General Report Comments: Gained access by worker, no security/handler on site as they also only work night shift with the dog. According to worker they are only feeding the dog once daily. The dog enclosure is very good much bigger than standard size and have grass appropriate kennel shade and water. Dog has choker on and no identification board. However the dog is very ill looking - eye discharge, dull coat, seems a little underweight. Send warning per email to Cindy who is the contact person at Couver security. She informed me that this is not one of their dogs their contract with this company has been terminated and informed me the current security is ProForce. Eventually got a hold of a person named Chippie 060 541 3944 who is one of the managers of the new security company. Emailed the same warning to him investigations@proforce.co.za. He then also informed me that they hire their dogs from another different security company and he will forward to them. On 11/09/2026 I received a call from Tasmia who is apparently the contact for the new security company - 084 445 5536. She asked if they can send the report by latest Monday. I have also requested their PAPA.
