General Report Comments: Met with owner. One dog is chained on the stoep with only a cushion. Said they have been jumping the wall but showed me the material is busy fixing the wall when then roam freely again. The female is also chained on stoep at the back only blanket. Told owner to fix wall as soon as possible as it is not adequate to keep the dogs chained as they currently are for long periods. One of the black and tan male dogs is slightly underweight. Owner confirms they have not dewormed in a while and is due. Will deworm and provide extra feed to ensure dog picks up weight.
