General Report Comments: Upon arrival the four Jack Russel dogs were in the front yard with the owner. All four Jack Russels were in satisfactory body condition; however, none are sterilised. In the back yard the male Staffie was being kept, also in satisfactory body condition but not sterilised. A large kennel was present in the back yard with food and water. The Jack Russels stay inside the house with the owners. On the other side of the property that is enclosed from the back and front property, three dogs were present. These dogs belong to the owner's son who moved in with them. The female mix breed gave birth two nights prior to 8 puppies.

According to Mr van der Merwe, he is in contact with Shireen Vlaming to have all the female dogs on the property to sterilise as well as, having her rehome the puppies when they have been weaned.
