General Report Comments: The dogs are confined in a portion of the back yard. The confined area is not small like a cage, both dogs can comfortably move around freely within the area and even sprint up and down if they so wish. The area is clean with no excess faeces seen at all, no flies present and buckets filled with water were clean. A large bucket containing pellets was present. The dogs are fed a diet of Bobtail pellets. A large make-shfit kennel is present for the dogs. Although the space is of sufficient space, I discussed with Mrs Kolotse to inrease the size on both ends for a larger long term arranegment. We agreed that each month a large section will be extended. The puppy has had its first vaccination and deworming with the Springs SPCA.
