CHECKLISTS

General Report Comments: The son was home alone and did not want to give me access onto the property without his parents present. He proceeded to call his mother who spoke with me over the phone. The labrador x and Sharpei dogs could be seen in the front yard, with the Chow, Yorkie and Dachshund x dogs in the back yard. The Sharpei dog appeared to be the only dog out of all of the dogs to be thin. She also had fly strike on both ears and the labrador had fly strike on one ear. The mother informed me that they rescued the Sharpei from the neighbours who left her behind and that the dog suffers from anxiety. According to the mother the dog loses weight when she is confronted with situations that makes her scared; such as, stormy weather. I was further told that the dog has been examined by Dr Cindy from Nigel and that the dog was given vitamins. I was told that the dogs are fed a diet of Bow Wow and that even on other brands the dog never picked up body condition. The mother then asked if I could conduct the inspection when she is at home after work in order for her to show me all the relevant treatments and the dogs at the back.
