General Report Comments: The three cats were not inspected as they were hiding during the inspection. The two dogs present were in satisfactory condition. The property is enclosed with a mixture of precast and brick walls with a total perimeter height of 1.8m. The front and back yards can be separated with metal gates by the driveway. An uncovered pool is present in the back yard. Two large kennels are present in the back yard; however, the dogs sleep inside the house at night. Additionally, the dogs have constant access to the inside of the house during the day as someone is always at home. The dogs and cats are fed a diet of Lokuno pellets, a specialised diet as they have sensitive digestive tracts.
