General Report Comments: During inspection two of the four cats were not seen. The entire property is enclosed with precast walls with metal fencing on top. The property is divided into sections, with the applicant staying in the back section with her two cats. However, the dogs will all be allowed to free roam the entire property together; therefore, the dogs need to meet to ensure all dogs are comfortable with each other. The dogs from the main house sleep indoors and have permanent access to the house or at the very least, the enclosed stoep area. Food and water bowls are within this stoep area.
