General Report Comments: The plot is large and spacious for the five dogs present. All five dogs are in satisfactory condition. There is a large metal tub filled with clean water for the dogs to drink from. Multiple shaded or covered areas throughout the yard is used as shelter by the dogs. The owners mentioned two concerns, one of which the small male brown dog escapes the property from a back gate by going underneath the gate into the neighbour's yard to eat chickens. We spoke about securing the gate to prevent the situation from happening again. The second concern is when the dogs hear the neighbour's dogs barking they all start barking and then get into fights with one another. I educated the owners about the fact that having four unsterilised male dogs, especially three dogs that are siblings, could become problematic as they will try fight for dominance and for the female mother dog. The owner informed me she would let her husband phone me to discuss the situation and find solutions as he is more involved with the dogs.
