Like to report two different situations at this location. Both need to be inspected. It's possible that it's two different owners. 1. Is as you drive through the property from main gate off the rd to Oude Wellington guest farm. Is horses left in very wet paddocks on slopes where there isn't even a level section for them to stand. Horse has been left outside in these rains day and night with zero shelter, not even a tree. Unable to take a pic as it's raining and dark 9pm. No coat or any form of protection. 2. is at the location of Oude Wellington guest farm. Several bird aviaries. With a mix of Macaws, Cockatoos etc. Minimum shelter. Cages spread all over. Most can't even fly around as cages are to small. Goffin Cockatoos are in a cage with no access to the ground and no flight ability. Scarlet Macaw is in poor condition. Seems to be a cash cow for breeding birds. Shelters are non to minimum especially in this weather. Totally unacceptable. Please report back on both. Horses need to be checked asap
