Comments:	I, Elani arrived at the location and met with the complainants. They showed me that the dog ran into a pipe that goes through under the road. The dog was sitting halfway into the pipe. I decided to crawl into the pipe as it seemed that the dog was injured. I called Hugh before doing this as back up. I got the dog out and when Dr Gouws saw it, she confirmed its hind left leg is broken. We therefore euthanized he dog.
