Comments:	I met with Dr Skye Sheerin and Dr Anize today at the SPCA regarding Dogs and All as they told me that they will be inspecting the facility. They say they have to make appointments and therefore when they get there, usually everything is in place. They agreed with what I wrote the warning for. I gave them copies of all the documents we have especially regarding the veterinarian issues. We discussed PSIRA and PAPA license issues as well. I also have the two workers PSIRA accreditation attached. Jaco Lewis is not registered and rejected by PSIRA. See attached screenshots. I then emailed the new and adjusted warning 069 to Dogs and All. Dr Annelie called back to warn me about the measurements I gave for the enclosures as it has not been approved legally yet. I understood and took note of that. To follow up on veterinary concerns within 48 hours.
