General Report Comments: Hugh and I, Elani arrived at the property and introduced ourselves to Chebani. We explained the reason we were there and saw that there are multiple chicken transport crates stacked in his yard. When asked, he said he transports about 1000 chickens a day but never recently have brought chickens to his home either to keep or in his transport.

I asked whether we can walked around in the yard to see whether there are chickens and he showed us all around and there was nothing but the crates.

He does however have two 8 week old Boerboels in his yard. They were in great condition with collars and kept at the back to keep them from the front gate. They have an outside building as shelter with beds inside.

We educated him about Boerboels and sterilization especially as the females are prone to prolapses. He seemed very keen to have at least one of them sterilized. We gave him a SPCA information pamphlet.

There were no Contraventions found under the Animals Protection Act 71 of 1962.

Case can be closed.
