General Report Comments: Elani and I,Hugh arrived at the property and we noticed the horses in camps without shelter,muddy camps and possibly enlarged hoofs.

We then entered the property and saw three workers on sight.While driving around we noticed a few birds in a cage with another cage placed inside for two ringnecks.While looking at the birds we noticed they had dirty water bowls,not adequate shelter and lived in parasitic conditions.

We then called the worker named Nelson and asked him who is responsible for the birds .He then mentioned that he is responsible for the birds.

We then went to the housekeeper and asked her who the owner is .She mentioned that the owner is Michelle and she usually only arrives at home around 7 the evening.While speaking with her we noticed 3 large dogs and 1 small breed dog.

We spoke to Nelson and requested that they should build shelter for the horses .We also explained to him what we require from them and he complied.We also asked him to ask the owner to contact us.He also said he will take it on him to make sure the birds are sorted with cleanliness aswell as clean water.We also noticed the birds recieve sunflower seeds to eat .

He then mentioned that he will speak to the owner and explain everything we mentioned.

We the issued warning 034 to:
