General Report Comments: Elani and I,Hugh arrived at the property and we could see the dogs from the gate. We could then see that the dogs were actually in good condition.

We then walked around the house and could see an open window .We then called from the outside and Yolanda then replied.She then came to the window and we got a chance to greet her aswell as introduce ourselves.We then explained that we got a complaint about her dogs being in worrying conditions and attacking each other.She then gave her dogs names and descriptions to us.

She then explained to us that Tyson has a habit of nibbling on Alexa's legs when she barks,so now Mike has also learnt this habit.She then basically turns around and scares Mike which causes to scream as if he is being hurt(we noticed no marks on Mike).

We then gave her our number incase anything were to happen .

When asked whether her dogs are sterilized she said that she actually wants to sterilize them. We then explained that Alexa is too heavy for us to do at our premises but Mike is the right size .When it comes to Tyson he seems a bit to old to sterilize .

We then asked her which food she feeds as the complainant mention they are not in good condition.She then went and took a photo of her bag of food and it was a adequate brand of food.

She also showed us the two shelters that she has for the dogs and the dogs also live inside the house most of the time.

We then told her that she could contact our office and organise a sterilization date for Mike .
