General Report Comments: I, Elani arrived at the property and called several times before Davine came out. I introduced myself and explained why I was there.

The dog can be seen from the road and is kept on the right side of the house. As we approached German I saw a chain around it body and that there is a runner but the chain gets tangled up. I saw that by the collar and the connection to the chain, they have swivels but only used the clip side and not the swivel. I then explained to her how to place the swivel on the cable and that that would prevent the chain from tangling. The dog also had a crate as zhelter with a piece of roof stacked against it not affording enough protection against the elements . German also has a chain as a collar. I eplaind as the fog is small, a collar is supposed to work otherwise they can put piping around its neck. German had access to clean water.

I issued a warning to:

- 1) Place German on a wotking running chain (chain must be connected to swivel) within 7 days.
- 2) Provide adequate shelter (three sided, raised flooring, and waterproof roof)
- 3) Provide adequate collar /piping for German within 7 days.

Davine accepted and signed the warning.

To follow up within 7 days
