General Report Comments:

Inspector Elani and I, Hugh arrived at the property. We then called from the outside and the owners came outside to greet us. We then explained to him that we were there in order to do the post home inspection for sting. He then allowed us access.

Upon entering the premises we could see that there was an additional male dog named Major with Sting. We also could see that both of them were in good condition. We then looked around and could see that they had both their dog bowls filled as well as a water bowl.

They also explained that they usually lay down under the bench on their front porch as it is cooler there. We were pleased by the condition that Sting was in.

Alec also mentioned that he wants to sterilize Major as he has a bit of hormonal problems and we educated them on sterilization again.

Overall Sting gets along well with his family as well as the other male dog and is in good condition.
