General Report Comments: I, Elani arrivex at the property and met with Maria who is the owner of the dog named Boeboe. This puppy was on a static chain but had access to food, water and shelter. Maria explained that they chain him at night when they are sleeping as he escapes through the fence and comes into vontact with dogs with ticks. Their yard is enclosed and the small openings that he can escape through can be closed to keep him inside. Maria immediately loosened him so he is free roaming and she is at home the entire day. She said she will let him sleep inside at night and try to close the small openings in the gates of the property. I also gave her our information pamphlet for sterilization and our mobile clinic.

I issued a warning to:

1) Boeboe is on a static chain. Ensure that he is unchained at all times and that the fencing is adequately closed to prevent escape.

NFA as there are no othee issues and owner complied immediately.
